

USAPL SCORING APP HOW-TO

USAPL scoring app works in tandem with FargoRate app.

Download both apps FargoRate AND USAPL Scoring from the Apple App Store or Android Google Play.

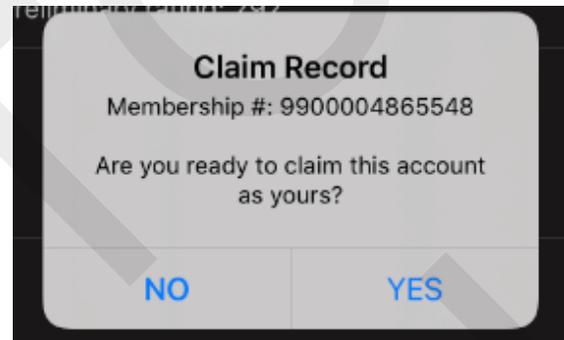

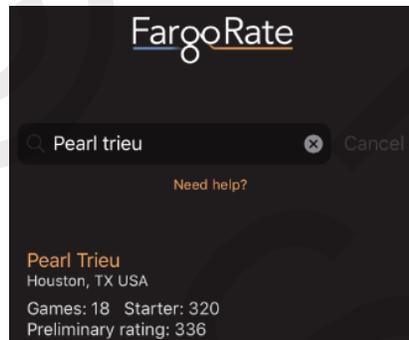

Open up FargoRate app first and click on “Sign Up”. Enter your Player Name.

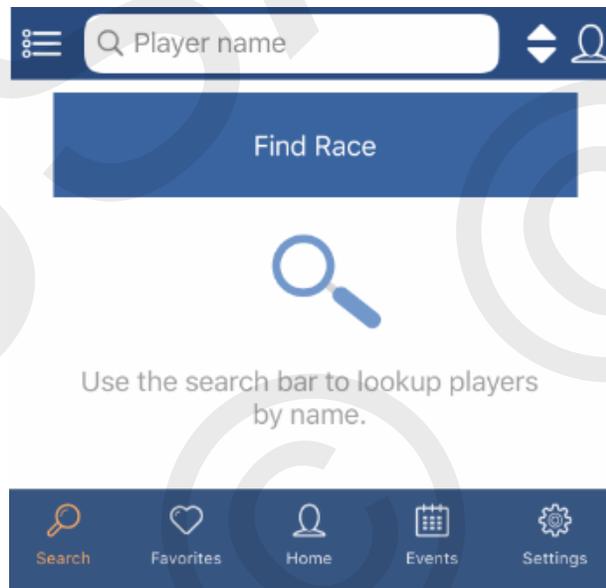

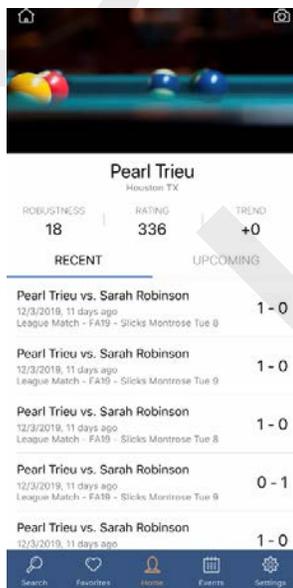

Once your name appears, click on it to claim your account. It will provide you with your Member ID #. **THIS IS THE ID # TO USE FOR BOTH FARGORATE AND USAPL APPS!**

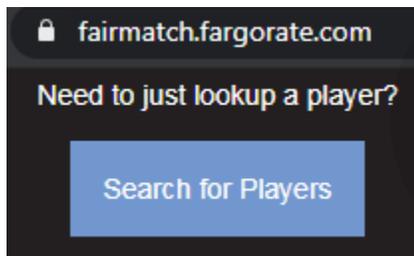

Once clicked YES, follow prompts to claim your number. An email address is needed to confirm claim of the account.

After confirming your email, you can now log into both FargoRate and USAPL Scoring apps using your member ID # and the same password for both apps.

FargoRate will show your member stats, which include your current Fargo Rating, your Robustness (# of racks played thus far), and a history of matches recorded and the results. You can also find players and their ratings, as well as race calculator.

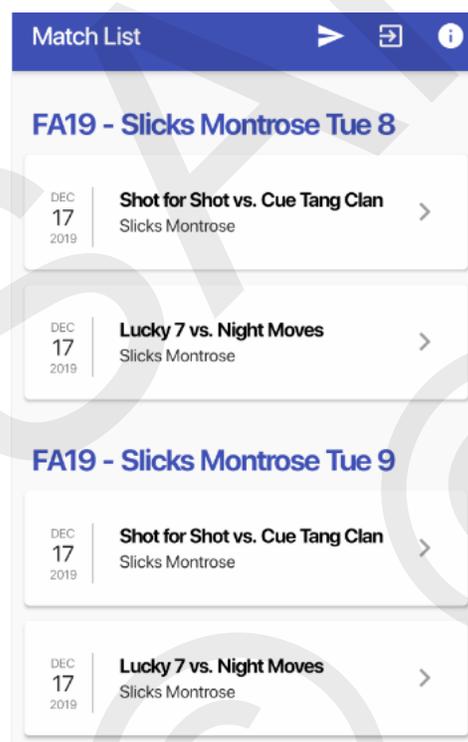

If you have already claimed your number but do not remember what your Member # is, go to fairmatch.fargorate.com and click on “Search for Players”. Enter your name and click on “Lookup”. It will look up your name, Member #, Robustness, and current Fargo Rating.

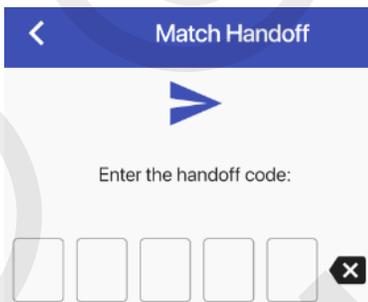

If still having trouble finding your Member # or trouble claiming your Member #, please contact support@fargorate.com

Open up the USAPL Scoring App. Use the same FargoRate member # and password to log in. Once logged in, home screen will show the division’s upcoming matches.

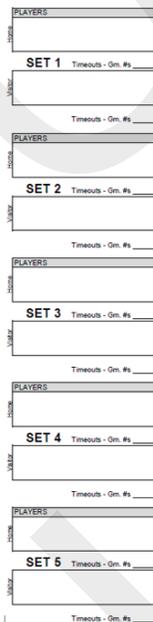

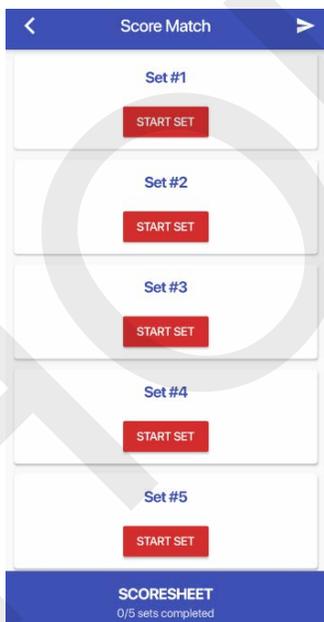

On the home screen upper right hand corner, there is a match hand off (➤) and a logout (🚪) button.

Match Handoff is used so team members can pick up scoring where someone else has left off in between phone apps.

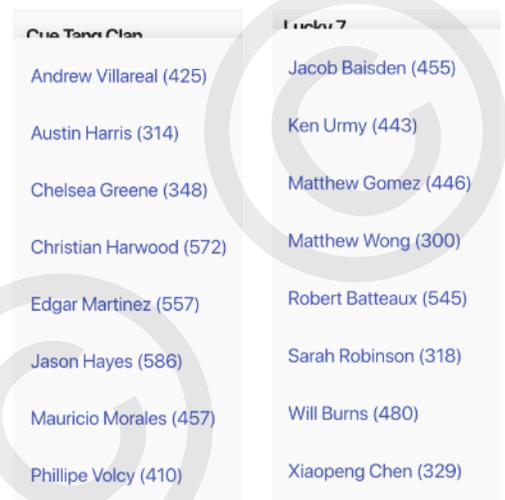

The current member scoring will generate a unique code, in which the new member to take up scoring will enter the handoff code to continue scoring on their own app.

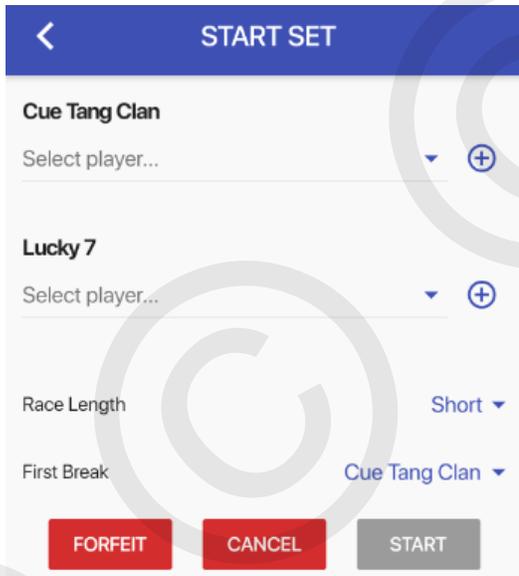

Make sure to select the correct format, either 8 or 9!

Once the match to be played is selected, the Home screen turns to "Score Match" screen. Similar to the paper scoresheet, select the correct set to start scoring.

Once a set has been selected, you will choose which team player is playing against the opposing team member. When selecting players, members' Fargo Rates are automatically updated/displayed.

Home Team is always on top.

Visitor Team is always second.

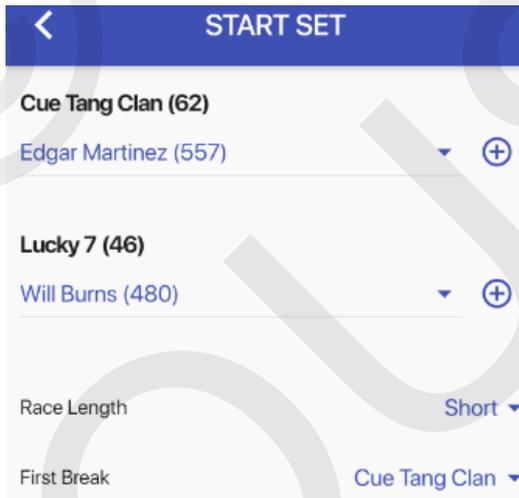

Race Length is always SHORT.

(app will automatically calculate race)

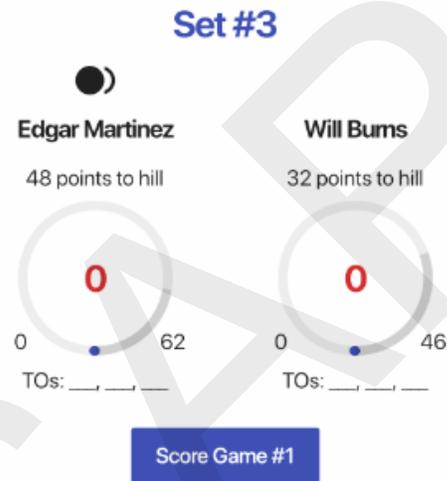

First Break is team that wins the lag.

Forfeit is used when forfeiting the set.

SAMPLE MATCHUP

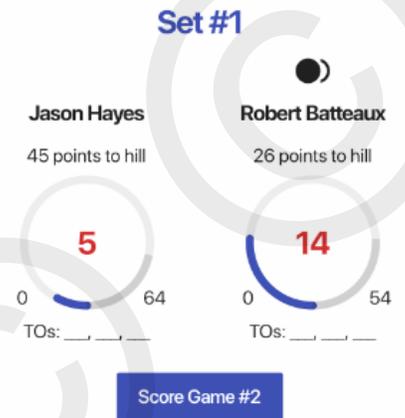

Once the matchup is set, click on start. The screen will display the following:

a dead ball, double click on the ball and do not swipe. It will not count towards either player's ball count.

Dead balls are X'ed out. To count

If able to leave opponent with 0 points, you must choose a win-type for the score. The

app will prompt you to choose what type of win the rack was before moving on to the next game.

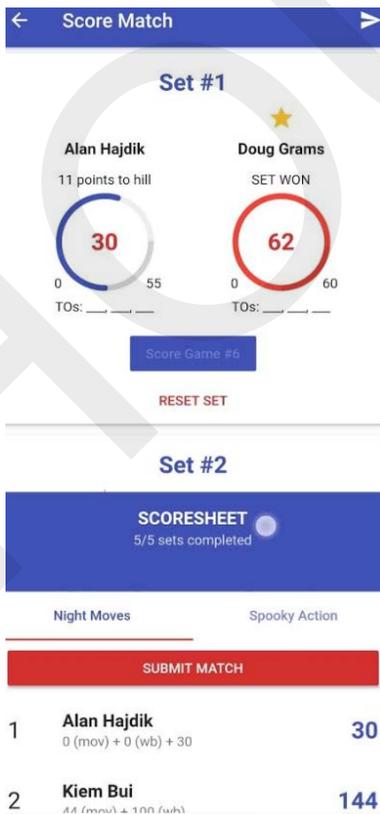

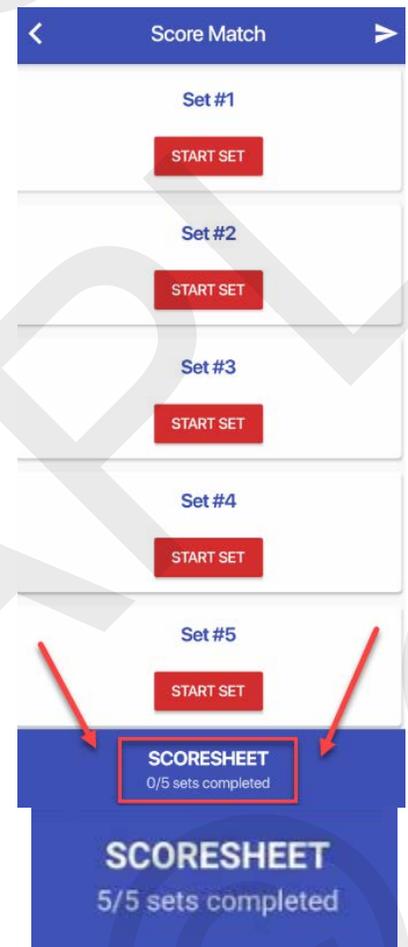

Time Outs work the same as 8 Ball.

Winner of the set will be indicated with a star.

#	SCORE 1	SCORE 2	TYPE	EDIT
1	5	14		
2	14	6		
3	14	1		
4	0	14	WB	

Once games have been completed, you can still go back and edit the scoring if there are any scoring discrepancies. Simply click on the Set in question and it will show you a history of the game results. Click on to edit.

Once all games have been played and scores confirmed, the bottom of the Score Match screen should indicate 5/5 sets completed. **SWIPE UP** to show the match summary as well as to **SUBMIT MATCH** in order to turn in your match results.
